

Tiffany Bouchard

Software Developer

I am fuelled by challenge and curiosity that drives my passion to build products that enrich lives. I strive to actualize innovative concepts while executing pixel perfect design and clean code.

Experience

August 2020 – Present

Web Developer – Bidgala

- Building out an art marketplace that currently hosts over 400 artists and their artwork
- Develop and design responsive pages for several key pages (homepage, product page, add listing page) using HTML, CSS and jQuery
- Collaborate on the backend in Python with PostgreSQL, specifically payment gateway with Stripe and live chat with WebSockets

July 2020 – Present

Full-Stack Developer - Freelance

- Developing an eCommerce site for small Toronto-based business
- Brought client's concepts to life through creating designs with Figma
- Built and developed front-end and back-end with Next.js for React and Sanity headless CMS, styled with styled-components

May – July 2020

Student - General Assembly Toronto

- Full-time student in the Software Engineering Immersive program including over 400 hours of training
- Completed three individual and collaborative full-stack projects incorporating technical skills acquired
